

AMAN DADHICH

Data Analyst

amandadhich1897@gmail.com | +91-8560922604 | [Linkedin](#) | Jaipur, Rajasthan, India

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on experience in **SQL, Python, Power BI, and Excel**. Completed a Data Analytics Virtual Internship with **Deloitte Australia** and delivered a Healthcare Cost & Insurance Analytics project analyzing 10,000+ patient records. Skilled in data cleaning, KPI reporting, dashboard development, and exploratory data analysis. Adept at translating complex data into actionable business insights across industries.

TECHNICAL SKILLS

Programming & Data Analysis: Python (Pandas, NumPy, EDA, Data Cleaning, Outlier Detection)

Database & SQL: SQL, MySQL, PostgreSQL, Azure SQL, Big Query

Reporting Tools: Excel (Pivot Tables, VLOOKUP, SUMIFS, Conditional Formatting)

Data Visualization: Power BI (DAX, KPI Dashboards), Tableau, Looker Studio, MicroStrategy (MSTR)

Domain Knowledge: Healthcare Analytics, Insurance Claims, Business Intelligence, KPI Reporting

PROFESSIONAL EXPERIENCE

Associate | NEXLINE PHARMA PVT. LTD

2024-Present

- Performed comprehensive EDA and statistical modeling on pharmaceutical, organizational, and campaign datasets to support strategic, data-driven decision-making.
- Leveraged predictive analytics, clustering, and advanced segmentation models to uncover key order patterns and market opportunities, contributing to a 10% revenue uplift.
- Evaluated marketing and sales campaigns by analyzing customer behavior, prescription trends, and product uptake using Python (Pandas, NumPy, Scikit-learn) and SQL.
- Built forecasting and optimization models for inventory management, product distribution, and demand planning across major pharmaceutical markets.
- Delivered actionable insights through Power BI/Tableau dashboards and clear model interpretation, improving product positioning, stock allocation and Operational efficiency in a regulated pharma environment.

PROJECTS

Healthcare Cost & Insurance Analytics Dashboard

Tools: SQL (MySQL) | Python (Pandas) | Power BI | Excel

- Analyzed **10,000+ patient records** to uncover cost drivers, claim patterns, and insurer performance using SQL and Python.
- Wrote **complex SQL queries** (JOINS, window functions, subqueries) to extract diagnosis-wise cost and claim approval data.
- Performed **data cleaning in Python (Pandas)**: removed duplicates, handled nulls, and detected outliers using z-score method.
- Built a **4-page interactive Power BI dashboard** with DAX measures tracking claim approval rate, avg. treatment cost, and regional KPIs.
- Used **Excel Pivot Tables and SUMIFS** to model cost recovery rates and flag high out-of-pocket patients for insurer review.
- Identified that **Cardiac & Oncology** patients drive 38% of total cost, and Insurer D had a **24.3% rejection rate** vs. 14.1% industry avg.

Automobile Sales & Service Analytics Dashboard

Tools: *SQL (MySQL) | Python (Pandas) | Power BI*

- Processed automobile sales records and built **SQL queries** to analyze monthly revenue and top-performing car models.
- Designed **interactive Power BI dashboard** visualizing sales KPIs and identified repeat customer trends.

SQL Customer Behaviors Analysis

Tools: *SQL (MySQL)*

- Used **SQL joins and aggregations** to analyze purchase frequency, revenue distribution, and customer segmentation.

Resume Reader AI Chatbot

Tools: *Python | LangChain | LLM | RAG | PDF/Text Extraction | Embeddings | Vector Database | Streamlit*

- Built a **RAG-based** chatbot that allows users to upload a resume PDF and ask questions about its content.
- Implemented PDF text extraction, document chunking, embeddings, vector retrieval, and LLM-based response generation.
- Designed the retrieval pipeline to ground answers in relevant resume content and reduce unsupported responses.

Resume Intelligence AI Agent — RAG, MCP, DSPy & MLOps (In Progress)

Tools: *Python | RAG | LLM/Agents | MCP | DSPy | FastAPI | MLflow | Docker | Cloud*

- Developing a production-oriented AI agent that analyzes resumes and job descriptions, performs skill matching, identifies skill gaps, and generates explainable recommendations.
- Planned implementation includes a custom MCP server, DSPy-based reasoning/optimization, ML-based job matching, RAG evaluation, MLflow experiment tracking, Dockerized deployment, and cloud deployment.
- Building baseline-versus-improved RAG experiments and evaluation workflows to measure retrieval quality, answer quality, latency, and model performance.

EDUCATION

Bachelor in Technology | Poornima Group of Institutions, Jaipur

2019

CERTIFICATIONS

- **Power BI Certification** – TuteDude
- **Deloitte Data Analytics Virtual Internship Certificate** – Forage
